SkyRC FuriaX Supa Agile - 1/10 Sensored Brushless Motor for Drifting 13.5T

Price	**45.24 Euro**
Availability	**Available in stock**
Shipping time	**24 hours**
Producer code	**SK-400036-02**
EAN	**6930460009326**
Manufacturer	**SkyRC**

Product description

SkyRC FuriaX Supa Agile - 1/10 Sensored Brushless Motor for Drifting 13.5T 1/10

Drifting is a dance of rhythm, balance, and timing — and the FuriaX Supa Agile moves with you. Its sensored architecture shapes every throttle pulse into fluid, predictable power that’s built for the perfect slide. Supa Agile reads every throttle tap with clarity. From wall-hugging slides to snap-back corners to full-send high-angle drifts, it delivers the steadiness, accuracy, and courage to push further.

Power That Drives Real Drift Control

From the first squeeze of throttle to the moment the car arcs into drift, FuriaX Supa Agile delivers precision in every movement. Powered by 190W (13.5T) and 250W (10.5T), it pulls with confidence, holds its angle, stays effortlessly in control.

Sensored. Predictable. Ultra-Responsive.

The 6-pin sensored system ensures precise rotor position detection for instant startup, stable low-RPM control, and seamless throttle feel — the foundation of modern drift tuning.

Made for Drift Demands. Proven in the Real World.

Through repeated transitions or extended high-angle slides, the Supa Agile stays smooth and thermally stable, supported by efficient airflow and consistently stable performance. With a –10°C to +80°C operating range, it’s engineered for real-world drift conditions.

Designed to Fit

With universal M3 screws, the 25.2 mm mounting pattern, and a 3.175 mm shaft, Supa Agile drops straight into most 1/10 drift chassis. Mount it right out of the box — no mods, no hassle, just hit the track.

Modular by Design. Built to Last

Supa Agile features a fully rebuildable, modular design—allowing easy disassembly of the housing, stator, windings, and bearings with standard RC tools. Clean, service, and swap components to keep performance sharp and consistent, race after race. Always fresh. Always in control.

Two Turns. One Precision.

Whether you choose 10.5T for punch or 13.5T for flow, the core performance DNA stays unmistakably Supa Agile. Different feel, Same DNA, Same perfection!

Adjustable Timing. Any Track.

Adjustable timing is the core of brushless precision, enabling power delivery to adapt seamlessly to any track condition.

Multiple Turn Options. Ready for Any Track.

Each turn rating gives your car its own distinct character. Lower turns deliver explosive speed and powerful thrust.Higher turns offer smooth, consistent power for confident control, lap after lap.

In this auction, you are purchasing the 13.5T version with the following specifications

Specification

Size: 35,8 × 54,4 mm

Weight:
10.5T: 165g±5g
13.5T: 167g±5g
Working and Storage
Operating temperature: -10°C-80°C
Operating humidity: 20%-80% (non-condensing)
Storage temperature: 0°C-50°C
Storage humidity: 30%-60% (non-condensing)
