Product description

The Signal Loss Alarm & Lost Aircraft Finder is controlled by a tiny MCU. As simple device, it can be plugged into a
TX signal and emit a loud 85dB alarm. Ideal for warning you if you have not turned off your RX power supply whil
finding a model in the long grass, simply turn off your TX the alarm will sound and the red LED will start to blink!
Signal Loss Alarm & Lost Aircraft Finder is a "must-have" accessory for fliers.

If you don't want the alarm to beep after one minute. You can disable one minute TX inactive warning by simply

- Loud >85dB alarm gets your attention.
- Built-in LED.
- Can be used as a reminder to turn off the R/C receiver.

- One minute TX inactive warning can be turn off (Mode 2).
- Plugs into any standard 4.8 - 6.0 V DC powered receiver.
- Average current draw is under 2.5mA when idle, 50mA during alarm.
- Small size and weight (~7-grams).

Specifications:

Dimension	
Operating Voltage	5-6 volts
Alert Level	85dB
Protection	IP20
Storage Temperature	-10-50℃
Operating Temperature	0-40℃
Current Consumption	

	Weight		7g
