SkyRC GC301 GYRO

Price	**23.57 Euro**
Availability	**Not available**
Shipping time	**24 hours**
Number	**190**
Producer code	**SK-600068**
Manufacturer	**SkyRC**

Product description

GC301-Gyro for RC Cars, It is a device using gyro sensor and software algorithm to adjust steering output, providing you with a more stable and controlled driving experience.
The Gyro's heading hold effect manages steering output by automatically keeping the car's tires aligned in the direction you chose. It will also precisely maintain car direction regardless of the amount of traction of the track or outside force apply to the car. With heading hold, the car is more maneuverable and controllable.

•Make corrective steering adjustment for RC cars
GC301 gyro allows you to drive the RC car toward a given direction and taking precision turns at high speeds more manageable, more controllable and more stability.

•Remote gain function
You can adjust gain from the transmitter CH3 by using the remote gain function. Gain can also be adjusted with the trimmer on the GC301.

	Dimensions		
	Gyro Sensor		Vibration Structure Gyro
	Operating Voltage		4-8.4V
	Current Drain		25mA
	Operating Temperature Range		-10ºC to +45ºC
	Weight		3.6g

Specifications:

	Dimensions		

			
	Gyro Sensor		Vibration Structure Gyro
	Operating Voltage		4-8.4V
	Current Drain		25mA
	Operating Temperature Range		-10ºC to +45ºC
	Weight		3.6g
