### Product description

TORO TS150  
150A Brushless Sensored ESC

Toro TS150 150A ESC is big power in a small package, intended for 1/8th buggies, truggers and monster trucks running up to 6S LiPo. The innovative new case allows for fan changes and built in 6V/9A BEC. Leading the industry not only in power handling ability but also size and features with Throttle Control, Drag Brake, Custom Brake Input Curve Voltage Cutoff for LiPo, ESC and Motor Overheat Protection and much more.

As always, Toro TS150 150A ESC offers industry leading software and firmware update functions and can be programmed by SkyLine via PC, Program Box and even your smart phone.

#### All-new Design

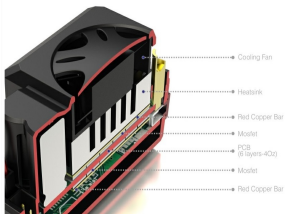

#### Unique Electronic Power Switch

A simple push button operates the switch meaning to eliminate the problems associated with intermittent contact of an ordinary mechanical switch.

#### Less Resistance, Less Heat ,More Efficiency

#### 10 User Modifiable Profiles

The users could set and store 10 sets of profiles in the ESC. These data could be called out at any time without any special program setting. All the setting can be exported or imported so that the user could compare and analyze.

## Safety Features

Low voltage protection  
Motor and ESC overheat protection  
Signal lost protection

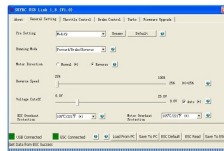

## Firmware Update

The firmware can be updated by connecting the ESC with PC or smart phone.

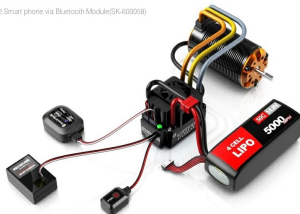

## Programming Method

It can be programmed by PC connected with 1.SKYLINK(SK-600013)

2 Smart phone via Bluetooth Module(SK-600098)

3 PROBOX(SK-300046)

## Precise Programmable Items

**Turbo Timing**  
When the car is in full throttle, turbo timing set can improve the RPM to get its best performance.
